Introduction:

In today's era of technology everything is changing rapidly. With one click of a button you can pay bills and fees while sitting on a couch in your home, you could do shopping and grocery easily. Technology has drastically changed the overall environment and culture of the organizations. Most of the human work is now done by the computers. Especially the covid situation has pushed the companies to change their old, traditional ways of operating and adopt the new technologies.

In upcoming slides we have discussed 4 apps has drastically changed the overall industry and how they have replace the old traditional way of working.
